Education

CMR Technical Campus Engineering and Technology

CGPA:8.5/10

B.Tech. in Computer Science and Engineering

Experience

Freelance DSA Mentor

2025 - Present

Various Engineering Colleges

- Conducted mentoring sessions on **Data Structures and Algorithms** for undergraduate engineering students.
- Guided students through problem solving techniques, coding exercises, and debugging strategies.
- Delivered sessions across institutions including **CMR College of Engineering , BVC College of Engineering, St.Mary's College of Engineering**
- Assisted students in strengthening algorithmic thinking and preparing for coding interviews.

Software Engineer

2025 – Present

Delightech Innovations pvt ltd

- Developed full-stack applications using **HTML, CSS, JavaScript, and Python backend frameworks**.
- Built and maintained RESTful APIs and handled database operations using **MySQL**.
- Implemented features for user management, authentication, and data processing.
- Worked on real-time debugging, issue resolution, and performance tuning.
- Contributed to projects involving **deep learning models (LSTM, CNN)**.

Projects

R.P. Welfare Trust Website (HTML, CSS, JavaScript)

- Developed a fully responsive and dynamic website to showcase social initiatives and donation activities.
- Implemented mobile-first UI, optimized performance, and structured clean component-based code. **Detecting Web Attacks with**

End-to-End Deep Learning (Python, TensorFlow, Keras, LSTM)

- Built an LSTM-based deep learning model to classify and detect web-based cyber attacks.
- Performed data preprocessing, feature extraction, and sequential modeling for accurate threat detection.

Block Hunter: Federated Learning for Threat Detection in Blockchain-Based IIoT Networks (Python, Federated Learning, Blockchain)

- Designed a decentralized federated learning framework integrated with blockchain for secure, privacy-preserving cyber threat detection.
- Implemented distributed learning nodes to detect anomalies in IIoT networks without sharing sensitive data.

Blockchain Certificate Verification System (React.js, Python, MySQL, Blockchain)

- Developed a secure certificate generation and verification platform using blockchain.
- Ensured tamper-proof storage and seamless validation through a React.js frontend and Python backend.

Technical Skills

Languages: Python, C, Java

Web & Backend: HTML, CSS, FastAPI, REST APIs, Firebase

Databases: SQL (MySQL)

Core CS: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

Machine Learning & CV: CNNs, TensorFlow, NumPy, pandas, OpenCV, Mediapipe, Generative AI (LLMs, Prompt Engineering, Gemini API)

Soft Skills: Communication, Mentorship, Team Collaboration

Certifications: NPTEL – Problem Solving through Programming in C (IIT Kharagpur)

Achievements

- Received **Honourable Mention** at Hack4SDG among 200+ teams for the Carbon Compass project.
- Secured **2nd Place** at the Seekh Hackathon hosted by GLEC, winning a cash prize.
- Solved 400+ Data Structures and Algorithms problems on LeetCode.
